## Experiences

2015: DevOps (2 Months / Internship)

Company: SMILE Amsterdam

Mission: My mission was to use my technical knowledge to maintain consistency between developers and the IT team. I was asked to build a new deployment method for Magento and Solr. Obviously I used the opportunity to make a fully integrated environment and a code quality analysis with Ant and Jenkins.

Web and Business Intelligence (September 2013 – July 2015 / Sandwich course)

Company: SMILE Montpellier

Mission: Maintenance of web site under the E-commerce Framework "RBS Change" and issues management on websites with Pentaho (Business Intelligence). TPMA (Third Party Application Maintenance) on the Framework Liferay in java, for the internal system of Volkswagen Group France.

2013: Web and mobile developer (22 Weeks / Internship)

Company: Dev2a

Mission: Add new features to the mobile platform (iPhone / Android) and the website. Creating of a full analysis solution including data base and APIs to replace Flurry Analytics.

Result: New market share. Simplified user experience.

2012: Network Assistant (13 Weeks / Internship then short term contract)

Company: Polyclinic Saint Jean Montpellier

Mission: Establishment and maintenance of an infrastructure using a Hyper-V cluster and assistance of medical personnel.

Result: Improved the performance of the architecture, better resistance to breakage, and decreased failures due to server's hardware.

2010: Volunteer host camps Rentals (4 Weeks)

This was a summer sport camp for children/teenagers from 6 to 16 years old. All the workers are volunteers for 3 weeks in the summer and 1 week in February.
